

Paw Paw Market.	
Potatoes	25c-30c
Butter	14c
Eggs	18c
Wheat	72c
Oats	29c
Coru.	35c

Local and Neighborhood News.

We are now prepared to receive dry or green wood on subscription.

War social this evening at the residence of C. R. Avery, given by the ladies of the Presbyterian society. Musical and literary programme. Refreshments from 5:30 to 7:30. Entertainment at 8 o'clock.

The Pension Examining Board at this place have organized and meet every Wednesday in Dr. Palmer's office in the H. P. Phelps building. The board are Dr. E. A. Palmer, of Hartford; Dr. E. B. Dunning, of Paw Paw; Dr. G. L. Rose, of Decatur. *Hartford Day Spring.*

Industry is always commendable, but there is a wide difference between legitimately directed industry and an avarice which will require seven days' work per week from every member of a family, barely giving the children an hour in which to attend their Sunday school, and emphasizing the lessons learned there by lugging lumber all the afternoon. But we have just such people in Paw Paw—people whose names are on church books as members in full connection, and who pay no more heed to the Sabbath than to any other day in the week. "Fye" on such a way of bringing up a family of children!

The Free Will Baptist Sunday school missionary fair will be held Tuesday, Oct. 8th, at the store-room now occupied by H. W. Showman. Articles beautiful and useful, will be arranged for exhibition and sale throughout the day and evening. Anyone wishing to buy good "home-made" bread, pies, cake, baked beans, etc., will find them at this place during the day. In the evening, after a brief introductory service, the different articles will be sold to the highest bidder. Don't fail to patronize this unique harvest home, filled with the fruits of honest toil, and for which the children have made their efforts.

The sale department of the Paw Paw Horse and Stock fair will be conducted the same as last year, except that entries in this department will be free. Any person desiring to sell any kind of stock will have the privilege of taking it upon the ground by paying the entrance fee at the gate only, and the property will be listed for sale by the secretary. Considerable advertising has been done among purchasers for the purpose of bringing people here to buy stock of all kinds at that time. An auctioneer will be furnished to sell at a commission of one per cent. at auction until 11 o'clock of each day, should any be offered for sale in that way—the auction sales to be at the option of owners. It costs but little to bring any animal which a farmer may have for sale, and it may be the means of securing him a buyer at a good price. It will, at least, let people know that the animal is for sale, and if the sale is not secured during the fair, it may lead to information that will make for him a sale afterwards. This is a new departure in agricultural fairs and must of necessity work slowly, but the management is in hopes in this way to build up a sale for stock that will be of great benefit to the community, and they ask the cordial support of their patrons, for whose interest alone it will work.

From an article prepared by Dr. W. W. Keen, for *Harper's Magazine* for October, under the head of "Extraordinary Achievements of Modern Surgery," we make the following extract in regard to some most wonderful diagnoses of cases of brain tumor: "Dr. Bennett had diagnosed not only the existence, but the exact locality of a tumor in the brain, of which not the least visible evidence existed on the exterior of the skull, and asked Mr. Godlee to attempt its removal. The head was opened and the brain exposed. No tumor was seen, but so certain were they of the diagnosis that Mr. Godlee boldly cut open the healthy brain and discovered a tumor the size of a walnut and removed it. After doing well for three weeks, inflammation set in, and the patient died on the twenty-sixth day. But, like the first Atlantic cable, it pointed the way to success, and now there have been 30 tumors removed from the brain, of which 17 have been removed from the cerebrum with 13 recoveries, and three from the more dangerous region of the cerebellum, all of which proved fatal. Until this recent innovation every case of tumor in the brain was absolutely hopeless. The size of the tumors removed has added to the astonishment with which surgeons view the fact of their ability to remove them at all. Tumors measuring as much as three and four inches in diameter, and weighing from a quarter over a third of a pound, have been removed, and the patients have recovered."

The following would indicate that there is still hope for the paralyzed. Frank Cornelius, Purcell, Indian Terr., says: "I induced Mr. Pinson, whose wife had paralysis in the face, to try a bottle of Chamberlain's Pain Balm. To their great surprise before the bottle had all been used she was a great deal better. Her face had been drawn to one side, but the Pain Balm relieved all pain and soreness, and the mouth assumed its natural shape." It is also unequalled for rheumatism, lame back, sprains, swellings and lameness. 50c bottles for sale by all druggists. [Oct. 6, 1899.]

The *Century Magazine* is preparing a series of papers on topics relating to "The Gold Hunters of California." The articles will be prepared for the most part, as were the War Papers—by prominent participants in the events which they describe. They will include accounts of early explorations, life in California before the discovery of gold, the finding of gold in 1848 at Sutter's fort, the journey to California by the various routes, (around Cape Horn, across the plains, by the Nicaragua and Panama routes,) life in the mining camps and in San Francisco, and other important aspects of California life at the time. The publication of these papers will not be begun until the series is further advanced.

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the permanent and speedy cure of Consumption, Bronchitis, Catarrh, Asthma and all Throat and Lung affections, also a positive and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellow-men. Actuated by this motive and a desire to relieve human suffering, I will send free of charge, to any who desire it, this recipe, in German, French or English, with full directions for preparing and using. Sent by mail by addressing with stamp, naming this paper, W. A. NOYES, 149 Power's Block, Rochester, N. Y. eow62w26

The following was telegraphed from Jackson to the Detroit News last Friday. The Dr. Bulson spoken of is a brother-in-law of Geo. E. and John I. Breck, of this place. "Last July Dr. Bulson, of Wisconsin, moved to this city and leased the Latimer residence. The doctor will now move out at once, owing to a circumstance distressing to his relatives. A short time ago two sisters of the doctor came here visiting, not knowing he resided in the house, and during the first night the younger one had a vision of Latimer attempting to shoot her with a revolver. She became hysterical and, waking, declared she was in the room where Mrs. Latimer was murdered, although she did not know it was the house or room. The sisters did not like the residence, and left for home the next day."

Bucklen's Arnica Salve.
The best salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns and all Skin Eruptions, and Positively cures Piles or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by Bartram & Millington.

Probate Court Proceedings.
Following is a synopsis of the proceedings in the probate court for the week ending Tuesday, Oct. 1st:
Estate of Enos Goodrich, deceased. Appraisers' warrant issued and inventory filed.
Estate of Emily Kinney, deceased. Hearing on claims adjourned to October 15th.
Estate of Lewis Parrish, deceased. Hearing on claims and estate closed to creditors.
Estate of Judson O. Phelps, deceased. Hearing on claims and estate closed to creditors.
Estate of John Merrill, deceased. Hearing on claims and estate closed to creditors.

Marriage Licenses.
No. 534—Jasper Buckley, 22, of Geneva, and Vina Bryant, 19, of Lee.
No. 535—A. J. Garrett, 22, of Waverly, and Edith J. Stedman, 20, of Cherokee, Iowa.
No. 536—Elmer Z. Dolson, 18, and Jettie Rider, 16, both of Bangor.
No. 537—John I. Breck, 27, and Nina Leah McCabe, 22, both of Paw Paw.

North Hamilton.
A. A. Olds took in the Detroit exposition.

Jack Frost made the corn fodder look sick.

Mrs. Jenkins is visiting her parents at Berrien.

A goodly number from this vicinity attended the Dowagiac fair.

Mrs. Manley, of Hartford, Mr. and Mrs. Ollie Hunkerford, of Kalamazoo, and Mr. and Mrs. Alson Manley, of Oregon, are the guests of Clem Manley and wife.

Glendale.
George Lamson and wife have moved in C. A. Fox's.

Allie Auton and wife are housekeeping in a part of C. Molby's house.

Miss Mabel Butterfield and brother Percy, of South Haven, are visiting relatives here.

Miss Vashli Rankin of Bloomingdale spent a part of last week as the guest of Bertha Rogers.

Wallie Chase, wife and mother, and C. W. Butterfield, wife and daughter, are visiting relatives in Gaylord.

Keeler.
J. B. Merritt and family spent Sunday with his sister at Bangor.

Grandma Timmons is failing in strength. Mrs. B. Timmons is also on the sick list.

Mrs. Irene Sweet sat in the family pew last Sunday, looking younger than she did ten years ago.

Justice Irish is at Dowagiac, taking care of his nephew, Martin Trask, who is sick with typhoid fever.

Will Draper has sold his house and lot, west of the Center, to Wall Johnson, who has taken possession.

We learn that another public hall is to be built in Keeler. We wonder for what. Surely, three halls ought to accommodate a small town of 700 inhabitants.

C. G. George, Esq., finding it is not convenient for a man to cook his own victuals and eat in solitude, has taken a wife. At South Haven, on the 25th ult., Mrs. Brown became Mrs. C. G. George, Esq. George is well respected, and his friends are glad to know he has taken upon himself new relations, and Mrs. George will receive a kind welcome.

About \$600 has been put on the M. E. church in repairs, and it was formally opened Sunday by Presiding Elder Levi Master, who preached morning and evening. His sermons were broad in scope, liberal in thought, and logical. At the close of the morning service solicitation was made for \$200 yet unprovided for, of which two-thirds was pledged in a few minutes, and the balance in the evening, which leaves the society in good shape.

A Sermon in Little.
We had been out walking in the cool of the day, says a letter about Tolstoi, and we had come upon a squad of 100 navvies who were employed at the railway. They were finishing their supper, and were on the point of turning into their vehicles burst and crusts form. The application of a little "camphor ice" or fresh cold cream will be found very soothing.—"Family Physician" in Herald of Health.

Rabbit Coursing.
Coursing, while comparatively a new field sport in this locality, is not entirely a present day importation from England. For many years it has been a recognized sport in California and west of the Mississippi. On the Pacific coast there are a number of coursing clubs using greyhounds against the local jack rabbit. The coursing by the Hempstead club is with fox terriers against the common wild rabbit, of the "cottontail" species, an animal very destructive to the growing crops, and for the extermination of which the authorities of Australia and New Zealand have offered large rewards.

In the United States, however, the rabbit is protected by the game laws, and can only be killed in the states of New York and New Jersey between Nov. 1 and Feb. 1. The rabbits are procured either by netting them or with box traps that insure their non-injury. They are fed and cared for until wanted, and then conveyed to the coursing ground in large boxes. The rabbits used at Hempstead are mostly captured in the neighborhood of Babylon, with several small lots from New Jersey.—New York World.

New Gulls.
Susie Hunter vs. Robt. G. Hunter. Divorce. Heckert & Chandler. Wm. Smith vs. Vassar Selkirk and Julia Dyckman. Appeal from justice court.

Science describes some experiments made on the cigarette by Professor W. L. Dudley, of Vanderbilt university, as follows:

The fact that cigarette smoking produces physiological effects differing in some extent from those of the cigar led him to make his experiments. The frequently ascribed causes of the difference—that of the adulteration of cigarette tobacco with opium and other drugs, and also the presence of arsenic in the paper—are for many reasons unsatisfactory and insufficient. It is true, no doubt, that the tobacco in many of the less expensive brands is adulterated with cheap drugs and artificial flavors, and that in the more expensive grades opium may be used; but it is equally true that many cigarettes are made of tobacco which is free from sophistication. The presence of arsenic in the paper is entirely out of the question. There is a difference in the methods of smoking a cigarette and a cigar or pipe.

In the two last mentioned the smoke is simply drawn into the mouth and expelled directly therefrom or through the nose, while the experienced cigarette smoker will inhale the smoke, that is, draw it to a greater or less extent into the air passages, and in some cases to the greatest depth of the lungs, and thus the absorption of the carbonic oxide and other gases will take place very rapidly, causing more or less deoxidation of the blood, and thereby impairing its power to build up the wasting tissues of the body. 1. That carbonic oxide is the most poisonous constituent of tobacco smoke; 2. That more injury results from cigarette than cigar or pipe smoking, because, as a rule, the smoke of the former is inhaled; 3. That cigarette smoking without inhaling is no more injurious than pipe or cigar smoking; 4. That the smoke of a cigar or pipe, if inhaled, is as injurious as cigarette smoke inhaled; 5. That the smoke from a Turkish pipe, if inhaled, is as injurious as that of a cigarette inhaled.

To Treat Colds.
Wear woolen or silk underclothing (wool is decidedly the better, as it is porous), strong boots, rubbers always in wet weather. In regard to cold curing, nearly every one has his own treatment. A few suggestions, however, may not be amiss. The "nightcap" treatment is often successful. Another efficacious remedy is hot onion gruel, and eating a quantity of highly salted food is good. Glycerine, with cream or whisky, will relieve a paroxysm of coughing. Another excellent remedy, on the first symptoms of cold, is to take, on retiring, four grains of Dover's powder and two grains of quinine in pill form. If this is successful, repeat the dose next night.

Failing, the next best thing is to consult a good physician, remembering an "ounce of prevention." Children may be given a few drops of sweet spirits of niter, bathing the feet in hot mustard water and copious drinks of warm lemonade. Those unsightly things, "herpes," or cold sores, should never be rubbed, as they vesiculate and crust form. The application of a little "camphor ice" or fresh cold cream will be found very soothing.—"Family Physician" in Herald of Health.

A few suggestions, however, may not be amiss. The "nightcap" treatment is often successful. Another efficacious remedy is hot onion gruel, and eating a quantity of highly salted food is good. Glycerine, with cream or whisky, will relieve a paroxysm of coughing. Another excellent remedy, on the first symptoms of cold, is to take, on retiring, four grains of Dover's powder and two grains of quinine in pill form. If this is successful, repeat the dose next night.

Failing, the next best thing is to consult a good physician, remembering an "ounce of prevention." Children may be given a few drops of sweet spirits of niter, bathing the feet in hot mustard water and copious drinks of warm lemonade. Those unsightly things, "herpes," or cold sores, should never be rubbed, as they vesiculate and crust form. The application of a little "camphor ice" or fresh cold cream will be found very soothing.—"Family Physician" in Herald of Health.

Wear woolen or silk underclothing (wool is decidedly the better, as it is porous), strong boots, rubbers always in wet weather. In regard to cold curing, nearly every one has his own treatment. A few suggestions, however, may not be amiss. The "nightcap" treatment is often successful. Another efficacious remedy is hot onion gruel, and eating a quantity of highly salted food is good.
